Applicant will provide three copies of plans (grading and erosion control) and specification of the proposed construction. If it is over one acre a SWPPP is required to be submitted. If it is over five acres a NOI (Notice of Intent) to the TCEQ is required.											
Contact Building Inspection at 972-466-3225 twenty-four hours prior to beginning construction.											
☐ By signing below, I hereby certify that I have read and examined this application and know the same to be true and correct. All											
provisions of laws and ordinances governing this type of work will be complied with whether specified herein or not. The granting											
of a permit does not presume to give authority to violate or cancel the provisions of any state or local law regulating construction or the performance of construction. The issuance of any permit neither exempts nor modifies any covenants, deed restrictions, city											
ordinances and/or state or federal laws, whether herein specified or not.											
Permits are not emailed to applicant. To have the City mail the permit, please provide a stamped, self-addressed envelope.

Development Permit Exemption Certificate (Flood Plain)

The below named applicant applied for a Development permit on reviewed the application and it is his determination that the propose	. The Administrator has ed development is located within an identified flood plain of:				
The Administrator has reviewed plans and specifications of the propostandards required by the city of Carrollton's flood plain management following described work:					
To maintain compliance with the development standards of the city eliminate or minimize flood damage potential to the proposed devel development in accordance with the following special provisions:					
☐ For residential structures the lowest floor (including basement) must be elevated to two (2) feet above the 100-year ultimate flood elevation. Minimum finished floor elevations must be shown on the plat or site plan as approved by the City Engineer.					
For non-residential structures, the lowest floor (including basement) must be elevated to two (2) feet above the 100-year ultimate flood elevation. Minimum finished floor elevations must be shown on the plat or site plan as approved by the City Engineer.					
Applicant must submit an Elevation Certificate from a registered professional engineer, architect, or land surveyor that the finished floor level of the structure has been constructed two (2) feet above the 100-year ultimate flood elevation.					
☐ For non-residential flood proofing, a registered professional engineer or architect must certify that the flood proofing methods are adequate to withstand the flood depths, pressures velocities, impact and uplift forces and other factors associated with the base flood.					
☐ For fill activities, the applicant must submit a certification from a registered engineer or land surveyor that the level of the compacted fill material is at or above the elevation of the 100-year ultimate flood elevation. All fill activities must meet the city compaction requirements including all supporting test documents.					
☐ Provide a certified copy of all final plans or As-Built drawings to the Administrator.					
☐ Contact Building Inspection at 972-466-3225 for construction inspection.	pector assignment. Contact must be made 24 hours prior to				
NOTE: Issuance of this permit does not imply that proposed constru approval is entirely at the developer's/contractor's risk. Issuance of t
