

Throughout the state of Texas, March is Texas SmartScape month where we celebrate and educate on the benefits and beauty of Texas native and adapted plants. This year's celebration includes a great class by a favorite local landscape expert, Bonnie Reese. Learn when, where and how to plant each of the recommended plants, their size and height at maturity, seasonal color, texture, and more. This program provides information on trees, shrubs, vines, perennials, groundcovers, and turf grasses.

Come join us for this great class!

Saturday, March 14
12:30-4 p.m.
Hebron & Josey Library
4220 N. Josey Lane

Cost is free but registration is required. Visit cityofcarrollton.com/water and click on "Events and Classes" to register.

Bonnie has worked in the Dallas area for more than 20 years as a landscape designer and has a fervent passion for beautiful Texas landscapes that are easy to maintain.
